

How to install MongoDB Compass

Source: <https://docs.mongodb.com/compass/master/install/>

Install on Ubuntu

To install on Ubuntu, download the `.deb` package from [downloads page](#) and double click on the `.deb` package to open the package using Ubuntu Software. Click **Install**.

Once installed, launch Compass.

You can also download and install via the terminal:

1. Download the package:

```
wget https://downloads.mongodb.com/compass/mongodb-compass_1.6.0_amd64.deb;
```

2. Install Compass.

```
| sudo dpkg -i mongodb-compass_1.6.0_amd64.deb;
```

3. Start Compass.

```
| DEBUG=* mongodb-compass;
```

Install on Red Hat Enterprise Linux (RHEL)

To download and install:

1. Download the package:

```
| wget https://downloads.mongodb.com/compass/mongodb-compass-1.6.0.x86_64.rpm;
```

2. Install Compass.

```
| sudo yum install mongodb-compass-1.6.0.x86_64.rpm;
```

3. Start Compass.

```
| sudo DEBUG=* mongodb-compass;
```
